

Now—Handle “anything that rolls”
with the **NEW BLACKHAWK**

Ten-Tonner

Hevi-Duty Service Jack

The new Blackhawk TEN-TONNER is capable of lifting ANYTHING that may drive into your shop! And with ease of operation that means more and faster work! There's new improved swivel saddle and swivel wheels for easy load positioning. Extra long chassis gets under overhangs faster. There's less stooping—less squatting—easier spotting! Low saddle height of $5\frac{7}{8}$ " means TEN-TONNER sneaks under even lowest axle trucks. Full 18" lift range assures plenty of working clearance. Be sure your shop has at least one TEN-TONNER—ready to pick up the big fellows when they arrive!

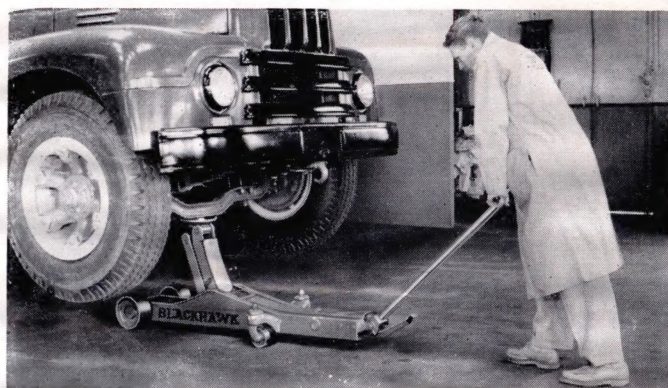

SJ-16

“lifts anything
that drives into
your shop”

Check These Big Value Construction Features!

- SAFER** Safety Lock on handle prevents accidental lowering.
Large Cupped Saddle means load won't slip off.
Wide Base means jack can't tip, is sturdier.
- MORE EFFICIENT** Low Saddle goes under lowest axles with tires flat.
Long Frame (66") reaches under overhanging bodies.
Full or Part Stroke Lift means no wasted motion.
- EASIER TO OPERATE** Featherweight Handle has spring-balance — light lift on return stroke.
Roller Bearing Front Wheels means easier dollying — easier positioning.

- TEN-TONNER's exclusive QUICK LIFT LEVER, below T-handle, permits operator to see as he spots saddle under axle. Light loads may be lifted by foot power alone! TEN-TONNER may be used in cramped quarters impossible with any other jack on the market.

New TEN-TONNER moves in fast, sets up fast, lifts easy!
Be sure there's at least one in your shop!
